Copper, Brass and Sheet Iron Ware manufactured to order, and the shortest notice and on the most reasonable terms.

Poetry.

MEMORY.
BY W. M. PHILLIPS.

I. Stand on a funeral mound, Far from that lifeless form, With a barren heart around, And a cold shroud above thee;

And think, while the wind moans free, And the night in cold gloom closes, Of spring, and spring's sweet violets, Of summer, and summer's roses.

II. Sleep where the thunders fly Across the tossing billow; And the lonely deck thy pillow; And the strong arm cradled forever; In mockery dantes of thee.

Of the cheerful hearth and the quiet home, And the kiss of her that bore thee.

III. Watch in the deepest cell Of the woman's dungeon tower, Till hope's most cherished spell Has lost its cheering power; And sing while the galling chain, On every limb binds free.

Of the woman hurrying on the plain, Of the breath of the mountain breeze.

IV. Talk of the mistle's late, The warbler's high endeavor, When the hanged life is late, And the strong arm cradled forever; Look back on summer's day, From the mist of dark December; Then say to the broken-hearted one, 'Tis pleasant to remember!

Literature.

"LOOK UP."

"Misfortunes," it is said, "never come singly." This was certainly verified in the family of William Thornby.

He had gone prosperously with him for a time, but soon a promising speculation failed entirely, and his affairs became sadly involved.

Some hopes of recovery presented themselves, when a fire broke out in the place, his house of business fell a prey to the flames, and almost every article was consumed, and to render the misfortune greater, the insurance had expired the day before.

Thornby and his large family were reduced to absolute poverty. Nor was this all; his anxiety and exposure during the fire, brought on a fever, and for weeks his wife and daughters hung over him, almost despairing of his life.

At length, however, the fever abated, and although he was left as weak and helpless as an infant, he had returned to health, but good nursing and freedom from mental anxiety.

Careful and affectionate nursing was not wanting, but it was impossible to prevent mental uneasiness. His children must be supported, but how? They would share with him in poverty, perhaps the disgrace which the involved state of affairs would bring upon him; and many would heap upon him unmerited reproach.

There remained but one way by which his family could be entirely relieved, and on this he at once resolved. The house in which they lived was valuable, and would command a ready and favorable sale. It was hard to part with a home he had made so comfortable, but there was no alternative. The house was offered for sale, and a purchaser soon found.

Every just claim was satisfied, and the family removed to a distant part of the country. Here, in a small, most dwelling, they found themselves in the possession of many comforts, and in their isolation for each other, the mother and children soon found contentment and happiness.

But the father's heart was still sad. He felt want of confidence in himself, and a mistrust in his fellow creatures. His whole appearance was changed. His countenance was downcast and sad; his steps lingering, irresolute, and no one would have recognized the once happy merchant in the ill-dressed and unhappy looking man, who now busied himself in cultivating a small piece of land that surrounded his little dwelling.

His wife sought by every means to arouse his dormant energies. The little property they had saved from the wreck would soon be exhausted. He was yet in the prime of life; his health was fully restored, why not again go forward, and endeavor to regain at least part of what had been lost? Surely it was a duty which he owed to himself and children. But her husband shrunk, from again mingling with what he called "a cold, unfeeling world."

"It will be in vain, Mary," he replied. "I shall be as the little we have left. You can hardly imagine the unfeeling manner in which the unfortunates are treated. Many will help those who seem likely to raise themselves, but very few will lend a hand to save those who are comparatively sinking."

"This is partly true," said his more hopeful wife; "but I trust not to the extent which you seem to believe. Place more confidence in your fellow men, and above all have more reliance on your Heavenly Father, and you will succeed. Begin at the bottom of the ladder, and seek a situation as clerk. You are certainly well qualified either for a salesman or accountant, and will no doubt obtain a good salary."

Mr. Thornby sighed deeply. "My health," said he, "will not permit me to lead the sedentary life of an accountant; as a salesman, I fear I should stand little chance of success."

"Not with that sad countenance, indeed; but strive to recover your former cheerful temperament, and all will go well."

"For your sake, Mary, and that of my children I will make the attempt; but I feel sure that it will fail."

Advertisements were put in the papers stating his capabilities, and went of a situation; but those failing to call forth any applications, he resolved to go himself and seek employment. He left home for the city with the sun downcast look, and slow and measured step.

His wife, who had watched him anxiously until he was out of sight, turned sorrowfully from the window, and said to her eldest daughter, "It is all in vain, Sarah; your

poor father will never succeed until he can learn to look up again naturally."

After some expression of mutual confidence and affection, the excellent mother and daughter determined upon two things; first to command the husband and father to the kind protection of Heaven; and next to commence together, if possible, the keeping of a small school. This latter plan, however, they determined to submit to the father on his return.

As Thornby approached the crowded city, he felt more and more oppressed by the doubts and fears which he had urged in the conversation with his wife.

The first place at which he called was the office of a commission agent, who had advertised for a person having qualifications which Wm. Thornby felt an undoubted assurance that he possessed. On stating his business a young clerk requested him to be seated; at the same time surveying him with a contemptuous air. Half an hour passed, and the employer entered. Thornby's name and application were laid before him. He stood for a moment quietly observing him, and without waiting to hear the qualification he was to urge, said quietly: "You will not answer my purpose, sir."

The applicant turned away without remonstrance, and left the office, saying to himself, "Just as I expected. I have every qualification he required in his advertisement; but my appearance does not suit him, that is enough."

The next trial was a large wholesale dry goods establishment. The refusal was equally decisive as the other; and as he turned to leave the store, he heard the employer remark to the clerk, "I make it a rule never to employ a person who looks as if he was unfortunate. Everything about that man shows that he is going down hill." "And wherefore," mentally added poor Thornby, "you will give him a push." He half resolved not to try again, but the thought of those depending on him urged another trial. With desperate determination he resolved to go to every warehouse in the street which he was passing, but he was unsuccessful, and with every failure he became more and more depressed till his anxious countenance could not fail to excite the observation of those around him.

As he turned from the last shop, he was accosted by a benevolent looking old gentleman in the garb of a Quaker, who exclaimed in a friendly tone of enquiry: "Looking for a situation, friend?" "Yes, sir," replied the Quaker, "I am in a little difficulty, which, if rightly acted upon, will finally help thee to attain what thou desirest."

"I shall be grateful for your advice," said this—LOOK UP!"

"At these words, Thornby raised his eyes from the ground, supposing it to be a command to look at his adviser; but to his surprise the old gentleman had already turned, and was walking rapidly away in an opposite direction.

"Some insane person," Thornby muttered, "I am in no humor for this folly." Then sorrowfully he turned towards his own home, quite convinced of the uselessness of further search.

His wife, not much surprised at his failure, still endeavored to cheer him, and proposed a plan of keeping a school. With some difficulty he obtained his sanction to what he considered an absurd undertaking. Circumstances were immediately printed, and Sarah and her mother called upon many families in their immediate neighborhood, and made known their intentions. Their lady-like and pleasing appearance, excited much interest, and they soon secured a sufficient number of pupils to encourage them in a beginning. The school rapidly increased and before the end of the first term they had more applicants than they could admit.

Many families were anxious that Mr. Thornby should receive their daughters as boarders; this occasioned an extension of their plan. A larger and more convenient house was taken and arrangements made for the accommodation of boarders and also for the reception of a larger number of day scholars.

Mr. Thornby viewed with wonder the success of his wife and daughter. Why was it that he alone should be rejected because he was unfortunate? How was it that they raised so many kind friends around them, and he alone was left in the world?

The words of the Quaker often came to his mind, and though he had at first regarded them as mere expressions of insanity, he now began to suspect that they in reality contained the advice which the old gentleman had said. If rightly followed, would it not insure him success?

"Look up!" Surely, man formed in the image of his Maker, should not, like the brute that perishes, cast his eyes upon the earth. Even when bowed down by misfortune, he should strive to look up to the light, which may yet illumine his path.

These thoughts now crowded forcibly upon Thornby's mind, and he was beginning to act in accordance with them, when his daughter bounded joyously into the garden, where her father was busied with some vines and told her father that he should smile upon her cheerfully, as he used to do, for that she had good news to tell him.

"You deserve to be smiled upon, indeed, my child," said he, gazing fondly on her cheerful countenance. "But what news have you for me?"

"One of the young ladies who attend our school asked me to-day if my father was in want of a situation or clerk; and when I answered in the affirmative, she said her uncle requested you to call at his office tomorrow morning. Here is the address."

Sarah continued, handing her father a slip of paper.

"Well, there may be something yet in store for me, Sarah."

"Indeed there may, dear father. Only think how well our school is succeeding. The income from that alone would afford us comfortable support. Our Heavenly Father is always near to help us in the hour of need."

"The heart of the strong man was bowed down, and his voice trembled with emotion. Tears of real sympathy welled in the eyes of his daughter as she whispered:—Your heart will no longer be sad, and dear father, will smile on us no more."

"My child," said he, "the dark shadow

has long been on me, but with the help of God I will no longer be cast down. Even should the new opening prove delusive, I will not be discouraged; I will now look up."

With a cheerful countenance and a step that fell sweetly on the ears of his wife, bringing to her remembrance the days gone by, he descended to breakfast the next morning, and at an early hour was on his way to the city. As he entered the office answering to the address given him, by his daughter, he was met by the same benevolent old Quaker who had proffered his advice on a former occasion.

"Well, friend," he exclaimed, extending his hand, "I am glad that thou hast followed my advice, and learned to look up. I have a situation now at my command where thou canst obtain a good salary without working harder than is fitting thy time of life."

The best remedy for a man who is going down hill, is to look up. When earthly hopes fail there is still hope in heaven.

The Three Boys.

Taunting and sneering in the field near the highway, a young lad attracted the attention of a gentleman who was journeying.

"My little friend," said the traveller, "why do you work so hard? You are laboring quite beyond your strength." "O, sir," answered the boy, "my father is very sick, and I do not know but he will die; and I must not stop here, for he will be angry, and beat me without mercy."

The gentleman passed on playing the poor child, who seemed to be in no better condition than a little slave.

He had not gone far before he saw another boy at work, with a cheerful countenance, to whom he put the same question. The little fellow at once replied, "My father is a rich man, worth many thousands of dollars; and he says, if I will be a good boy and work he will give me half of it when I come home. I mean to be faithful, and am sure of it in a few years; and when father dies I shall have the whole."

Continuing his journey, the traveller saw a third little stranger, laboring quite as diligently as the first two, and careful to do everything exactly right. To the same question, this lad replied, "I think, sir, you do not know my father; he is the best man in the world. I love him so, I would rather work for him than not. I cannot be idle or hindered, and let his business suffer." "Do you think," says the traveller, "that your father will give you anything for working so hard?" "I know my father will give me all that he can, his wages and beat, and will do right," answered the boy; and hesitates, I get my pay as I go along."

"Well," says the gentleman, "if you have such a father, and work for him because you love him, I have no doubt he will abundantly reward your faithful exertions."

Of this little narrative the reader can hardly fail to make an application. For what then do you serve God for? Is it through a slavish fear of hell, or for "loaves and fishes?" Or are you impelled by love to your heavenly Father and gratitude for his boundless grace in Christ? If you are constrained by the love of Christ, you find that in keeping the commandments of God there is a great reward; and you will not fail of a glorious recompense in the resurrection of the just.

Foreign and Colonial.

Mexico.

The Mexican Congress has granted extraordinary powers to President Comonfort, making him in fact dictator. This act is said to be justified by the state of disorder which exists in the republic.

The New York Times, giving a short summary of these disturbances, says—

"On the 22nd of October a military revolt broke out in Cuernavaca, which, for a time was entirely successful. The usual scenes enacted on such occasions were repeated, and large contributions were forced from the unfortunate people. On the 29th the Government troops drove the rebels from the town and retook it, but in the order of pursuit, they were surrounded and almost cut to pieces, and the victorious insurgents were once more at liberty to renew their outrages. On the 26th of October another military revolt broke out at Puebla, but the latest accounts do not mention whether it was successful or otherwise. In the vicinity of Acapulco, General Alvarez has been fighting for weeks with organized bands of bandits, who have assembled in sufficient force to offer combat to that brave old chief, and to interrupt all communication between the capital and the most important port on the southwestern coast. On Nov. 2, the inhabitants of Queretaro got up a pronouncement, and when the mail left, they were in a state of lively rebellion. The entire State of Yucatan is in complete revolt. At Campeche, particularly, the fighting between the Revolutionists and Government troops has been very severe; both parties were guilty of the most frightful excesses, and neither age nor sex was respected. In the midst of all this confusion the Indians have resumed hostilities, and we are assured that in some districts of Yucatan, the white population have been nearly exterminated—one or two instances they were massacred to a man. Nor was this all. Passengers by diligence dared not carry money sufficient for their necessary travelling expenses; and even in the capital itself, life and property have no security beyond the strong arm of its possessor."

WASHINGTON, Nov. 20.—We learn from an intelligent gentleman who has spent two or three years among the Salt Lake Mormons, a fact or two tending to confirm the suspicion that the recent massacre of over 100 California emigrants by Santa Clara Indians, was perpetrated under the influence of the Mormon leaders. It is evident that the savages who perpetrated this outrage are the same band who cut off Captain Gannison and his command, for they are the only band of Indians at Corn Creek who raise grain and have it to sell. They are the same, also, who a year or more ago, came very near massacring Dr.

Hurt, the U. S. Indian Agent, Mr. Barr, U. S. Surveyor General and their party, at the suggestion of Mormon emissaries, who rode into the Indian village a few miles ahead of them and announced that the Indian agent and his friends were coming to arrest and punish them for Gannison's murder. On that occasion, fortunately, they were accompanied by the war chief of a neighboring friendly tribe who succeeded with difficulty in satisfying the Indians that they were on a friendly visit. I learn also that Bill Hickman and Lot Smith—erroneously published Locksmith—who headed the party which recently destroyed the train containing supplies for the troops on their way to Utah, are two of the most notorious leaders of the Mormon Danite band, or "Destroying Angels." There is reason to believe that Brigham Young has fully made up his mind that he must leave Utah next Spring. It seems that part of the mission to England of Elders Orson Pratt and Ezra T. Benson, who are still abroad, was to seek from the British Government permission to settle in the British possessions. The application was refused.

The Murder Case.

John Finn, alias Flynn, alias Hamilton, a man in custody on suspicion of being the murderer of James Carlton, in the Township of Hungerford, in the County of Hastings, in the month of May last, has been at last positively identified. On Wednesday, a telegraphic dispatch was received by George Burnett, Esq., Police Magistrate, from Mr. Bartlett, Esq., a Magistrate of Belleville, stating that a bill of indictment had been found by the Grand Jury of Hastings, at the last Assizes, against a person answering the description of the prisoner, and desiring that the prisoner might not be discharged. Subsequently, a telegram was received from the Deputy Sheriff of Hastings stating that an officer would be at once sent over for the purpose of ascertaining whether the prisoner was the man wanted, and if so of removing him to Belleville under a bench warrant which had been issued for his arrest. The officer was expected here yesterday morning, in time to attend at the Police Court, but owing to a delay of several hours in the arrival of the cars, he did not reach Toronto until late in the afternoon. He immediately sought an interview with Mr. Burnett, and the necessary examination took place at that gentleman's residence.

The first witness examined was William Courtney, Police Constable, who said—In consequence of a telegraph received by the Chief of Police, I was directed to proceed to the Grand Trunk Railway station, at the Don Bridge,

The New Era.

Newmarket, Friday Nov. 27, 1887.

General Summary.

Although this day's paper is dated Friday, the 27th, we have issued on the 26th, on account of the Fast Day.

A resolution was adopted, by the Debatable Club of the Mechanics' Institute, on Friday evening last, admitting ladies to the Debate free of charge, whether members or not.

Messrs. Chan, Doan & Co., of Sharon, and Mr. C. Doan, of Aurora, have just received their Fall Importations. Their stock is replete with everything required by the country trade. See Advertisement.

A meeting of the Members of the Reform Central Vigilance Committee will be held in Newmarket, on Wednesday evening next, the 2nd proximo, at 7 o'clock. Place of meeting will be made known to members on application at this office.

Tuesday night last, was the coldest of the season. On Wednesday morning the thermometer stood several degrees below zero. A considerable quantity of snow fell during the first three days of the week; but not sufficient to make sleighing.

An Election is near at hand, but as yet the Clerk of the Assembly has not forwarded us a copy of the Journals. We should like to know how the present members voted, without hunting over the "Votes and Proceedings." The Journals must be printed on this time.

We have been requested to announce that service will take place in the Congregational Church, morning and evening, on the Fast Day; after which collections will be made to aid the India Relief Fund. Service to commence at 11 o'clock a. m., and 6 p. m.

The question is frequently asked—What are the Commissioners doing towards opening the Town Line West? Now, we do not pretend to be the mouthpiece of that Board, but we will answer the above question by stating that all the funds paid in by subscribers, has been expended. No doubt the Committee will shortly send around a collector, when we hope the friends of the project will be prepared to furnish him with the needful.

We regret to state that one of the children of Mr. Abraham Corryell, of this place, met with a serious accident on Monday last, which very near terminated fatally. It appears she was left in charge of a smaller child for a short time, and while attempting to build up a fire her clothes became ignited, and were nearly burnt off. Fortunately she had on a woollen dress, which, in all probability saved her life. Her arms, neck and chest is badly burned, and she now lies in a precarious condition.

Year after year we have been compelled to call the attention of the inhabitants to the necessity of keeping the side-walks free from ice and snow. If each individual would remove the snow, after a storm, in front of his premises, the side-walks would always present a clean and tidy appearance, and pedestrians pass along without being afraid of turning somersaults. The labor to each would not be great, while all would be decidedly benefited.

Those of our subscribers who purpose paying their subscriptions in wood, will confer a favor by delivering it as soon as possible. For good hard wood \$2 50 cts. will be allowed; green wood \$2 12 1/2 cts.—the difference between the price of subscription to the paper and the wood, will be paid in cash. All who desire to pay in wood, should let us know immediately, in order to give time to contract for the balance required for a year's supply.

CANADA DIRECTORY, 1887-8.—From the office of John Lovell, Esq., Montreal, we have received a copy of this admirable work. It is a large, handsome volume, and contains a very excellent map of Canada, besides the names of the principal business and professional gentlemen in the Cities, Towns and Villages throughout the province. Every business man in the country should procure a copy. Price \$5.—and may be ordered of the publisher, Montreal.

Rev. Thos. Baker, Congregational Minister of this place, has kindly furnished us a copy of the Minutes of the Annual Meeting of the Body held in Montreal about the middle of June last. It also contains some financial statistics, from which we take the following in reference to the church in Newmarket: Number of Members 37; average hearers, 75; Sabbath School Teachers, 7; S. S. scholars, 42; value of Church Property, \$2,400; salary of Minister \$250.—(notoriously too small); Church expenses during the year, \$76; amount raised for the Missionary fund \$91; Institute fund \$21; general purposes, \$138.—making a total of \$419. The body, as a whole, appears to be in a very prosperous condition.

Militaristic Crisis.

The Coalition has collapsed. On Friday last, Col. Tache tendered his resignation as Prime Minister, and was followed by his colleagues; whereupon His Excellency immediately charged Attorney-General MacDonald with the task of forming a New Ministry. The friends of Mr. MacDonald have called to his assistance Hon. Mr. Cartier, who undertakes the collection of Lower Canada material. The vacancy caused by the retirement of the Ministerial Secretary, and the late Ministerial

try being unable to find two gentlemen possessing anything like political reputation to fill the office referred to and the one temporarily supplied by the Premier—the Commissioner of Crown Lands,—has contributed to this result.

That Mr. MacDonald will be able to call around him a sufficient number of gentlemen to fill the various offices in the Administration no one pretends to deny; but whether they will be men possessing the confidence of the country, is a question. The Attorney-General has long been considered the ruling spirit of the Coalition,—and judging from his antecedents, what can be expected from him in future? The dodge, however, to rid themselves of the sins of omission and commission—of the trucking, trickery and knavery of the Coalition just expiring, before making an appeal to the electors, by the formation of a New Ministry, was really a clever one;—fortunately for the country it is too open and barefaced not to be detected; and Mr. MacDonald, with those he may call around him as his colleagues, must stand or fall upon the acts and policy of the late Administration.

That a general election will follow, is almost sure; in fact the language of the organs on this point is unmistakable. "It therefore behooves the electors of Canada to prepare for the coming struggle. No stone will be left unturned by the agents of the 'powers that be,' to secure the return of a majority of working supporters. Government patronage, and petty offices, will be liberally bestowed; and no doubt, any amount of bribery and corruption will be resorted to.

Electors of North York, prepare for the contest. Do not be deceived by the emissaries of those who would rob the country of her best interests, and the people of their civil and religious liberty. It is with pleasure we record the fact, that many of the grievances that divided the Reform Party in this constituency, at the last election, have been removed; and as Secretary of the Reform Committee, we have received the most gratifying assurances of unanimity. Many who opposed the present member, on a previous occasion, honestly and sincerely, will now yield him a hearty support, in case he is put in nomination by the Reform Party; and we feel assured, it is only necessary to state, that the Government organs are sounding the tocsin of alarm, to lead this constituency to prepare for the contest.

Sour Grapes.

It is really amusing, to say the least, to read the silly twaddle of the city organs, in reference to this constituency. The *Colonist*, in speaking of its future representation, says—"it is premature to speculate." While the *Leader*, not quite so guarded, but equally deceptive, states—"It is not impossible that Mr. Hartmann may discover that he does not possess a perpetual lease of North York." We might also make the insinuation, that "it is not impossible that the proprietor of leather and literature may discover that he will not have the opportunity of always retaining in his possession large sums of the people's money. Mr. Hartmann never stood higher in the estimation of the constituency than at present; and should there be an appeal to the people, and he be the chosen man of the Reform Party, never would he go to the polls with surer prospects of success. Since his last return to Parliament, he may safely challenge his opponents, even, to place their finger upon a wrong vote given. As a representative, during the last term, he appears to have given very general satisfaction,—and several leading gentlemen of those who opposed him at the last election, have given repeated assurance of their determination to render a cordial support, in case he again offers for re-election.

The *Leader* also says Mr. Hartmann "long ago aspired to the Commissioner of Crown Lands." It is really astonishing how this "Crown Lands Commissioner" sticks in the crop of our contemporary. No matter who the man is, or how capable he may be to discharge the duties of the office, ever since the Member for Gray has been in Parliament, the *Leader* has habitually traduced them, in the vain hope to pitch-fork his relative into that office. Surely, the *Leader* does not think the public so dull of comprehension as not to be able to understand his movements. It will be time enough for the organs to find fault with prominent members, who have exposed the duplicity of their masters, when they again offer themselves for re-election. We need not advise the electors, however, against giving credence to what those journals in the interest of the Government may say,—their character is too well known throughout the constituency. If the Administration want to make a trial of their strength, let them send one of their mercenary friends to North York, and we will vouch for it, the Riding will teach him a lesson. The field is open—now is your time. We should like to see the man who would dare stand up before the electors of this constituency and attempt to palliate the iniquities of the Coalition. It would be equal to Harnum's Menagerie. Governments have tried to buy and sell this constituency before; but the present Administration would find their defeat more ignominious than any previous one. The electors of this Riding have always expressed their opinions without fear or favor, and never will they be dictated by hirelings from the city. Besides, the iniquities practiced by the members of the present crew at the helm of affairs, would not be palliated by any sensible man in this constituency, and it would be inconsistent in them to support any person who could wink at their misconduct. The yarn of the present Advisers to His Excellency has been spun out, and they may as well yield up their places with a good grace, as to force the people to take the snail into their own hands.

By Telegraph last night, we learn that snow was 9 inches deep at Collingwood.

No Ministry Yet!

Up to the time we go to press, we have no reliable intelligence that Mr. MacDonald has succeeded in the formation of a New Ministry, although nearly a week has elapsed since he undertook the matter. When we consider that he must have known, for a considerable time previous to the resignation of the Coalition, that changes were to be made,—and this is evident from the fact that the gentleman he has called to his assistance from Lower Canada actually made a tour East in order to feel the public pulse and find new material,—we say, when we consider these things, it does not speak much for Mr. MacDonald's popularity not to be able to announce his colleagues ere this. There is evidently a desperate game being played by the wire-pullers; and they find themselves in an awkward fix. In order to get rid of the odium attached to the expiring Ministry, a new shuffle of the political cards has been made, and the Attorney-General turned up trump; but unfortunately for the new premier in expectation, he finds himself without supporters—at least, such is the natural inference, when he allows a week to pass without being able to announce his colleagues. Had an individual been sent for, not connected with the expiring Ministry, to form a new Cabinet, it would not have been a matter of so much surprise; but when we reflect that it is a man acquainted with all the outs and ins of the recent shuffling, it looks ominous, and does not speak much for his political standing in the country.

The next question that naturally arises is—Is His Excellency justified in allowing that gentleman so long a time to hawk about his wares? If Mr. MacDonald cannot find colleagues to work with him, why not send for some one else? It looks to us too much like a return to Compromise; and we venture to affirm, that in case of an appeal to the people, all these things will be remembered by the Electors of Canada. There is no disguising the fact, that every change made during the past three years, has had the one grand object in view, that of elevating certain families, and trying to build up a Canadian aristocracy.—In case Mr. MacDonald does not succeed, His Excellency had better call Solicitor-General Smith as his chief Counsellor, or the Mail Bags. Whatever he does, he will no doubt hang on to the present crew; at least, it appears so.

Correspondence.

We wish to be distinctly understood that we are not responsible for the opinions of our correspondents.

Richmond Hill and the Gazette.

To the Editor of the New Era.
DEAR SIR,—In taking up a number of the *York Riding's Gazette* of the 13th inst., I can assure you, I was greatly astonished and highly amused, at an article headed, "The County Town again and the Newmarket Era." I am not, sir, I am sorry to say, a subscriber to either of those Journals, and consequently know little of what has passed between them, in the late contest about the seat of the County Town; but whenever I have chance to see a number of the *Gazette*, I have been forcibly reminded of the old story, of "the little boy and his first long-tailed coat." Since Richmond Hill has managed to create enough gossip, dog fights, &c., &c., for material to fill a small sheet weekly, to distribute amongst its friends, it has scarcely been able to contain itself, and has finally contracted the habit of calling occasional meetings, to take into consideration the propriety of enlarging its dimensions, by taking in a great part of Markham and Vaughan, and thus sufficiently increasing the number of its inhabitants, to enable it to become incorporated, that it may do on a more equal footing with Newmarket and thus, vainly imagining it to stand a chance of being chosen as the seat of the County buildings, should a separation take place between it and the City of Toronto. Vain delusion! I would scarcely know whether its editorials on the subject were really seriously meant or were mere burlesques on the County Town question. Similar to the piece that appeared in it some time back, about the station of Maple being chosen as the future seat of Government, but I verily believe they are anxious on the subject,—and of all the absurd propositions, and unwarrantable assumptions ever generated this is the King. The very idea of a little ant-hill like Richmond Hill, situated so near Toronto, being chosen for such a purpose, is ridiculous in the extreme; we might as well have no reparation. Of the unpromising condition of the village and the unpromising state of its inhabitants, we have many proofs; for one I might refer you to the journal of one of its most respectable inhabitants, who a short time ago advertised a sale of building lots, and after trying all possible ways to make the people believe it was actually chosen for the County Town could, though the day was fine, the lots beautifully situated, and most of the population of the village collected on them, only sell three or four, and those all to one man, who lived some distance from the place, and who could certainly "see more things in Heaven and Earth than are dreamed of in the philosophy of the stately sober."

Now I live much nearer Richmond Hill than to Newmarket; but I would not like to see the people of the County, become so dead to their interests as to elect the former for their chief town; and had I thought there would be much danger of it you would certainly have heard of me before this. I often visit Richmond Hill and know no inconsiderable of its past history, which by the way would make a very uninteresting book; for an idea of its present aspect, I think I could not refer you to any thing more illustrative of it, than to "Goldsmit's devoted village," or improvements. The *Gazette* of course excepted,—there have been none within my recollection, unless you call the decomposition of buildings such.

Newmarket on the other hand, which I visit but seldom, but when I do I am sorely struck with the almost miraculous improvements it has undergone within the past few years, or since the care commenced running through it, though not in the least surprised, when I consider its situation, and the great number of people collected about the Station, going from and coming to the Town, via the cars; which number I am reliably informed exceeds that of any other station on the Road between Toronto and Collingwood, and if any one, who saw it four years ago, would see it now, with its numerous Mills, Stores and dwellings most of which were then, but building material, and now good buildings doing a flourishing business, he would not think, when informed that its inhabitants had doubled in that time, that there was any occasion for their sleeping "three in a bed," as the *Gazette* thinks they would be obliged to do, its numerous streets thronged with healthy looking children and adults, and the number of the village of its being an unhealthy place. The number of its physicians are no doubt required by the great number of wealthy farmers living in the surrounding Country; you know wealth breeds luxury, luxury creates disease, and when the people there get sick they want a regular physician to prescribe for them; while they pay them well for it, so that female M. D.'s such as those, with one exception, that drug the people of Richmond Hill would find no encouragement whatever at Newmarket.

But Mr. Editor, you should not have called the *Gazette* your quarantined friend; how could you, have they not generously offered to go shares? they having the buildings, and you finding men to fill them. How polite of them! how well they know they have no men competent to use the buildings supposing they had them, but the *Gazette* said nothing about where they would put those gentlemen he so kindly invited. He would not surely glow the men in their numerous old houses, with to let march on them; he should by all means have hinted as to what he would do with them, so that they would have an idea of the destiny that awaited them. Supposing that the people of the County should become insane and choose Richmond Hill for their Town; and the village of its being an unhealthy place, and the number of its physicians are no doubt required by the great number of wealthy farmers living in the surrounding Country; you know wealth breeds luxury, luxury creates disease, and when the people there get sick they want a regular physician to prescribe for them; while they pay them well for it, so that female M. D.'s such as those, with one exception, that drug the people of Richmond Hill would find no encouragement whatever at Newmarket.

By Telegraph

Arrival of the Vanderbilt.

St. John, N. F., Nov. 23.

The "Vanderbilt," off Cape Race, 3 p. m., on the 22nd.

The despatch of the "Atlantic," on the departure of the "Atlantic," resulted on the following day in a fearful panic, all banks refusing discounts in any shape. In the afternoon, however, the Treasury suspended the Bank Charter Act, and authorized the issue of notes to any amount approved securities. The effect was instantaneous, and the panic ceased as if by magic.

At Liverpool, Manchester, Glasgow, and other important cities the news was read with serious acclamations.

Cotton and all kinds of produce immediately enhanced in value.

Great monetary excitement in England. Several commercial failures are announced.

The following are the most important: Anderson, Sandman & Co. of Paris; Wilson, Morgan & Co., wholesale stationers, of London; Coddington & Co., iron merchants, of London; Fitch & Stee, provision merchants, of London; Mackenzie, Ramsay & Co., merchants, of Glasgow; Draper, Pictou & Co., of London; Kilmister & Co., of London; Ban, Brodie & Co., lumber merchants, of Glasgow; Steegman & Co., manufacturers, Nottingham.

The Bank of France has raised the rate of discount to 8 per cent, for bills under 30 days, 9 per cent, for bills under 40 days, 10 per cent, 60 days, 10 per cent, 90 days. Great money panic in Scotland, and run upon the banks. English money market steady. On the 13th Consols for money, 89½ to 90½; Bank stock 209½ to 212; reduced 88 to 91; Exchequer bills experienced recovery; Iron market dull, prices 2s to 3s lower; Sugar, demand is 1s 6d per cwt. higher; Coffee, slightly advanced; Wheat flat; Tallow market steady. Public feeling at Manchester, Bristol, Edinburgh &c., improved on hearing that government authorized the Bank of England to extend its issue of notes.

LATEST FROM INDIA.

The exact amount of the British loss is not known, but believed to be £1,150 killed and wounded, including 64 officers.

Scudliff has brought the mutineers of the Gwalior contingent under his control, by marching against them with his own troops, and then they and Thakore—thus cutting off their supplies &c.

Divisions and dissensions exist amongst the mutineers who were asked by the Shah Salahi from Delhi on the one hand, and entreaty from Nana on the other.

It was reported that Lucknow, which had been relieved on the 25th September, was again besieged by Nana with 50,000 rebels.

All the Sepoys found in Delhi were bayoneted by the British troops.

TORONTO MARKETS.

TORONTO, Nov. 25th, 1857.

WHEAT to the extent of 3,000 bushels changed hands at 4s 6d to 5s per bushel for good new wheat, and 4s 6d for prime old. There was little or no competition, and the market was without its usual buoyancy.

Flour is unchanged. Superfine is named at \$1.25 to \$1.50; Fancy, \$1.75; Extra, \$1.50 to \$1.75.

SPRING WHEAT is more inquired for, and for a very beautiful sample 4s 4d was paid, prices ranging down to 3s 3d per bushel.

OATS are not plentiful, and bring from 1s 1d to 2s 1d per bushel.

NEWMARKET MARKETS.

Newmarket, Nov. 26th, 1857.

In wheat we have this week to report a downward tendency. News from Europe being unfavorable, has caused a depression in the frontier markets here, and consequently we have to quote a decline of 5s per bushel. Prime samples now command 60 cts., a 55 cts. per bushel.

Spring Wheat, 65 cts. to 75 cts.

Flour has also declined considerably, and best samples may be bought at 53 to 54 cts. per bushel.

OATS are not plentiful, and bring from 1s 1d to 2s 1d per bushel.

NEW ADVERTISEMENTS.

MONTREAL WITNESS.
Commercial Review and Family Newspaper.

VOL. XIII.

THE Montreal Witness was commenced twelve years ago with a view to promote the interests, spiritual and temporal, of the people of Canada, and to oppose every form of error, injustice, and vice. The Witness is divided into the following departments:—

COTEMPORARY PRESS AND NEWS.—This department gives the essence of the news contained in the British, Canadian and American papers.

THE EDITORIAL DEPARTMENT contains, in addition to original articles, the regular and occasional correspondence of the Witness, and will be found to keep up with the events and topics of the day.

THE COMMERCIAL DEPARTMENT is felt to be of especial importance in a paper having a large circulation among traders and farmers, whose interests are affected by every change of prices in the market. To this department is brought the experience of a life of active commercial pursuit, and an intimate knowledge both of the internal and foreign trade of Canada, together with opportunities of obtaining commercial and financial information which cannot be surpassed.

There are also departments for Mothers and Children, for Young Men, and for Farmers. The Miscellaneous consists of Poetry and Miscellaneous instructive and religious articles.

The Review is filled with reviews of, and extracts from, new books and periodicals.

The Messenger Department contains the most interesting Missionary intelligence, and the most pointed religious articles, with anecdotes, stories, and geographical sketches.

We expressly ask the support and patronage of the fathers and mothers of Canada for the Witness, convinced that it will much more than repay its cost in the services which it will render to them and their children.

Besides a good local paper, which is indispensable, each family obviously needs a general paper, to supply which want the Witness is offered.

Letters to be addressed, (post paid) to JOHN DOUGALL, Witness Office, Montreal.

TO ALL WHOM IT MAY CONCERN!

WHEREAS the system of LONG CREDIT hitherto existing has been found detrimental, not only to the business man but to the whole community.

NOTICE IS HEREBY GIVEN That on and after the 1st day of January, 1858, the Merchants of Newmarket will require all accounts due them Half-yearly—that is to say, on the 1st day of January and July.

The Editors, concluding with the general Merchants of the place, who have been and after the 1st day of January next, they will render all accounts due them Quarterly.

M. W. BOGART.
Secretary to Board of Trade.

Mill Privilege and Saw Mill, FOR SALE!

For Sale, a Saw Mill and first-rate site for GRIST MILL.

WITH 25 feet head and on a good stream. These are for better situations for a Grist Mill in Canada—the Mill at Aurora being the nearest on the South, and will run the best for many miles. The Saw Mill is on the same stream, and is well adapted for cutting lumber.

The property is situated on the 1st of Nov. 1857, at the corner of the 1st and 2nd Streets, and will be sold at a bargain. The Mill Site property covers an area of about 12 Acres.

The property is situated on the 1st of Nov. 1857, at the corner of the 1st and 2nd Streets, and will be sold at a bargain. The Mill Site property covers an area of about 12 Acres.

W. A. GARR.
Newmarket, Oct. 15, 1857.

AMEROTYPES!

H. N. BRAMBLE
INVITES attention to his improved Amrotypes, which give the following advantages over the ordinary Daguerrotypes, viz:—Greater Durability, as their image is permanent; Amrotypes being derived from the Greek "Amrotos," and "Types," and are entirely different from the daguerotypes, and are therefore seen in any light or in any kind of weather.

Letter Portraits!
Mr. Bramble is now taking a new and beautiful kind of portrait for sending in Letters, without incurring the postage. They are as clear and brilliant as Amrotypes, and are taken by a similar process, and are entirely different from the daguerotypes, and are therefore seen in any light or in any kind of weather.

Patent Lifting Pump

But several have pleasure in announcing that they are now prepared to let, relative to the design and erection of the same.

FIRST LIFTING PUMP,

is by Mr. John Deming—one of the most skillful by competent judges to be the most simple of Pump now in use. From the simplicity of its construction, by the aid

OF SPRING PISTON,

the water is raised from the bottom of the shaft, instead of being sucked up as in the ordinary pumps. The water, instead of being sucked up as in the ordinary pumps, is lifted from the bottom—and with ease—thus avoiding friction and therefore making it almost impossible to get out of

Overing the well and to the pump.
 The pumps have been found to be of the depth
 sufficient to seventy feet, with admirable success.
 Satisfactory references can be given.
 Quantity to extend for Three Years.
 The pumps are also manufacturing an excellent
WOODEN PUMP,
 for Wells Forty feet deep, or over, which
 will hold sixteen barrels. Over 100 of them
 have been sold in the last Section of country
 to pass summer. References of a satisfac-
 tory nature can be given, to any person calling
 on the Manufacturer, Newmarket.
 For further of the above Pump, address-
 paid to the Newmarket Post-Office, will
 prompt attention.
